

# Herb & Strawberry Planter

NEW ZEALAND MADE BY EPIPlastics • [www.epiplastics.co.nz](http://www.epiplastics.co.nz) • Phone 0800 448 548

New Zealand Made

## Planting Instructions

1. Place approximately 40mm of coarse material (straw, garden waste, gravel etc) in the base of the Garden.
2. Place a central watering "core" down the centre of the Garden. A rolled up sack or newspaper is ideal. The core should be long enough to reach from the top of the Garden and sit on the base material, with a diameter of at least 40mm.
3. Build up the Garden with good quality potting mix or compost to the first holes patting down very firmly.
4. Lay the roots of your plant through the hole onto the soil. Cover the roots and hold in firmly with soil.
5. Fill the planter to the next holes and repeat, building up your Garden to the top.
6. Use the central "core" to ensure all plants receive adequate water
